

interschool sports

Launch

The primary also managed to have their Inter primary sports competition. On the Thursday it rained leaving doubt as to whether the pitches would be okay but by Saturday the ground was fine. It was cold though! Fourteen schools took part and it went really well. The sun also came out which was the added blessing. There must have been almost a thousand people there at peak time. The last matches finished at just gone 5.30pm and it was dark by then. We were there giving out the medals to the final winners of their age range.

Mags was excited to hold the Olympic torch.

Our sports field is about half an hour away from school (when the traffic isn't too bad!) They are doing many new road works and we had to pass a viaduct under construction, stop at the edge of the roundabout and wait for a gap in traffic to go on our way. We stopped there but the car behind us didn't and went into the back of us. This is getting to be a common thing. Mags got out to get the drivers' details etc. He said he didn't know where his mind was, he wasn't thinking! As usual, he didn't have any insurance! The school van has a number of bashes, mostly where someone has gone into us because they weren't thinking (none by Mags!!). To top it all, they never pay. Our insurance must think we are accident prone! The next day we had to go and make a statement for the insurers so that was another drive out.
